KENALOG INJECTION TREATMENT CONSENT FORM

Kenalog - 10 Injection (triamcinolone acetonide injectable suspension USP) is a synthetic glucocorticoid corticosteroid used for its anti-inflammatory action.

Kenalog - 10 Injection is indicated for alopecia areata, keloid scars, allergic dermatitis, acne cysts and inflammatory lesions.

Adverse reactions at injection site include: cutaneous and subcutaneous atrophy, dry scaly skin, ecchymoses and petechiae, edema, erythema, hyper and hypo pigmentation, thin fragile skin, and thinning scalp hair. Some adverse reactions such as cutaneous and subcutaneous atrophy (indentations of the skin) will heal in approximately 3 - 6 months.

I hereby consent to the Kenalog injection and have informed Magnolia Medical & Aesthetics of any and all health problems i may have and medications i am currently taking or allergic to.

PARENT/LEGAL GUARDIAN OF MINORS: I hereby consent that the providers of Magnolia Medical & Aesthetics perform Kenalog injections separate from and during clinical acne treatments on my child without me present at appointments.
